**Time Distribution of the Language Course and the S.T.P. Activities
in Alcott Hall**

1. Submitted herewith for your consideration are the time allotment studies of the S.T.P. Trainees during a regular twelve-week course of instruction.

2. It is felt that these breakdowns will supply the necessary facts to continue further discussions of the S.T.P. schedule. In addition, it provides ample grounds to argue for the time allotment necessary to carry it to a satisfactory completion.

3. The total allotment of time to language is one hundred percent greater than to the course of instruction under your direction.

4. Based upon the facts, it is our sincere belief that the ultimate value to the students lies in reversing the time distribution to favor the S.T.P. over the language training.
